

CanKids Pallium India Training Workshop on Pediatric Palliative Care Counseling

CanKids organized its 3rd Pediatric Palliative Care Workshop specifically focusing on counseling & communication in New Delhi, on the 15th & 16th July, 2011. This 3rd workshop was a step ahead towards improving our services specifically focusing on Pediatric Palliative counseling & communication to build a greater knowledge of current psychological care practices with a special focus on ways to promote the psychological well-being of child cancer patients and their families in Indian setting. Through this workshop, we explored the challenges most relevant to working with cancer-affected children in distress. The workshop was provided by experts like **Ms. Aneesa Joseph** (main speaker), MSW from Pallium India, **Dr. Anjay B.** Cankids Pediatric Palliative care physician, and Guest speaker **Ms. Shalini Narayan**, Psychologist, Fortis Hospital. It was attended by 45 participants (approx.) from different organisations like CanKids, DNip Care, GCCI, Holy family hospital and other individuals.

What is counseling?

- Counselling, according to Brammer and Shostrom is defined as a way of **relating and responding** to another person so that he/she is helped to explore his thoughts, feelings and behavior to reach a **clear self-understanding**. Also, the person is helped to find and use **his/her strengths to be able to cope** more effectively with making appropriate decisions, or taking appropriate action.

Introduction to palliative care counseling -Dr. Anjay

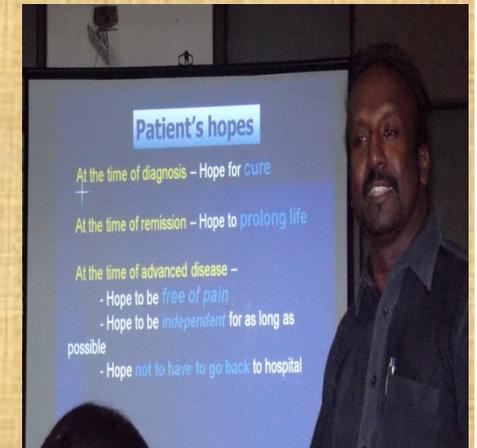

Pain Management
- Ms. Aneerja

When to reach the experts
- Ms. Shalini

The primary topics of discussion and highlights of the workshop were: Understanding what palliative care is all about- “It’s not about dying, It’s about helping children and families to live to their fullest while facing complex medical conditions” or “**Adding life to days rather than adding days to life**”, The concept of Pain and incorporating counseling in pain management, “**Pain is under-reported , under recognised and often under-treated, but We Can Change These**”, How to disclose/break the bad news for “how you tell it makes a lot of difference” and Bereavement Care - how to deal with it & do’s and don’ts. Also sessions on When to reach the experts/hand over the case and Self care - “**Look Within Yourself**” or **burnout** were much sort after and appreciated by the attendees. The workshop was a huge success and a great learning experience for all the attendees as one of our participant from DNip care provided us his feedback saying “**It was an excellent experience, while I learnt the basic facts about preparing/equipping the care givers or volunteers to take care of the patients.**”

Breaking bad news
